About Me

I am a creative web developer with extensive experience transforming ideas into unique and innovative digital spaces. My work philosophy combines contemporary elegance with traditional elements to create websites that are both functional and highly attractive. I am skilled in a variety of programming languages including JavaScript, Python, and Java , and proficient with frameworks like Node.js, Express.js, and React.js. I also utilize modern tools such as Git, GitHub, AWS, and Docker for efficient development.

Internships and Projects

internship

United Institute of Management (Duration: August 2025 - October 2025) In this time, we will focus on web development HTML,CSS , JS and frontend design. Our team members will support each other to develop an AI applications.

Projects

GAME-VIHAR

Duration: September 2025 - Present

This initiative aims to deliver digital education to students in grades LKG to 5 at government schools. It will feature engaging activities, including quizzes and games, to enrich the learning experience.

DermaDoc AI

Duration: April 2025 - August 2025

During this project, I created a responsive frontend for a chatbot designed to predict skin issues and offer solutions. Additionally, I integrated Python-based machine learning components into the backend utilizing FLAX and DIEGO, ensuring smooth model inference

Skills: HTML, CSS, JavaScript

My Portfolio

Here, you'll find a carefully curated collection showcasing my skills and projects. Discover a variety of work that reflects my expertise and passion. Each piece highlights my dedication to excellence. Take a moment to explore and appreciate the breadth and depth of my professional experience.

Achievements

Led the development of GAME-VIHAR, a digital platform for interactive learning in government schools. Achieved a 7.140 CGPA in the BCA program. Completed web development training in HTML, CSS, and JavaScript during a United Institute of Management internship.
